ADULT DIAPER MAKING MACHINE

Introduction

We, VARSHA Group, dedicated in Hygiene industrial for decades, have 8 factories in abroad so far as to offer the turnkey solution for the diaper/sanitary napkin/underpad & pet pad/manufactures by the full supply chain of machines, raw materials and finished products.

Our channel partner in abroad occupy 60000+M2 factory land for manufacturing of Machinery, Non woven fabrics, PE films, Frontal and side tapes, diapers, sanitary napkins and underpads, acheived 128 Million USD sales volume in 2020. Our diaper/sanitary napkin/underpad machines have been selected by International listed company "Greenleaf" after serious investigation and comparison by their professional team among the all machine factories. All our machine have CE & UL Certification and we passed the quality management system ISO9001.

We stick to the customer-centric policy and focus on long-term cooperation with every partner. We treat our quality and customer demand as the first priority and gain the full satisfaction from all buyers because of premium quality, considerate pre & after service, easy operating and maintenance, high speed and stable working status, with our exquisite design and technology innovation, our machines are the most cost-effective solution all over the worldwide factories.

Adult Diaper Machine Application

Full servo / semi servo / full automatic /semi auto adult diaper production line is mainly for producing adult diaper. We can design diaper machine according to your sample products structure and shape. For example, we can design machine to produce I shape or pull up pants and others.

ADULT DIAPER MAKING MACHINE

The adult diaper production line includes mainframe, Gluing machine, packaging system and other supporting equipment, including air compressor, visual inspection system and metal detector. The adult diaper machine can produce 4 sizes of diapers according to the order. We can customize I-type and pull-on adult diapers according to customer requirements.

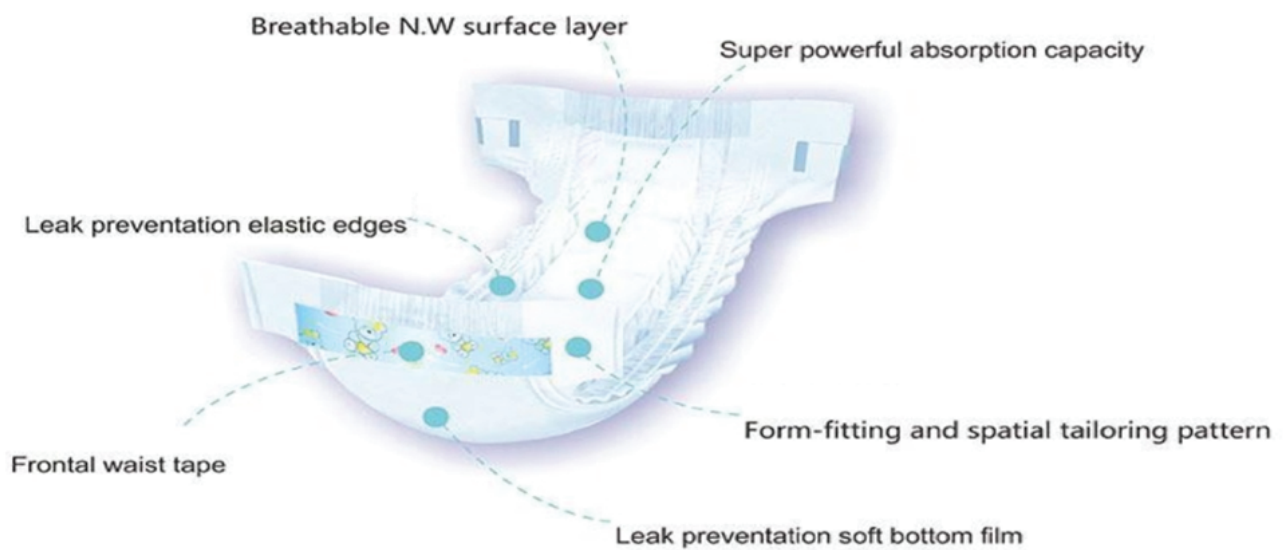

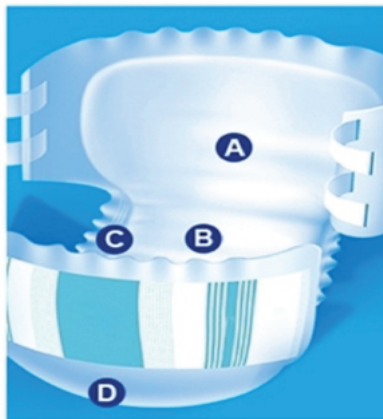

Following Material

The adult diaper making machine requires the following materials: fluff pulp, non-woven fabric, tissue paper, film, SAP, glue, ADL, elastic webbing, front tape, side belt, waist belt.

Configuration	
Product size	M: 680x650 L: 800x650 XL: 950x760
Product structure	SAP core,hydrophobic non woven(leg cuff), top sheet non woven. ADL, spandex,back sheet,tapes,elastic waistband, frontal tape,
Control system	PLC control system,Operating on the touch screen,Configure HDTV monitor.
Drive system	Servo Drive (Easy to change size), timing belt and flat belt are import products, and all the key parts, are imported bearings.
Tension system	Top tissue paper,bottom tissue paper,hydrophobic non woven(leg cuff), top non woven, ADL, back sheet,elastic non woven are adopt A&B shaft active unwinding by inverter motor.
Safety system	It has safety device on the operating side, matched with urgent stop switch. High audio fan uses sound insulation or silencer.
Materials corrective system	Germany BST automatic web guide system (optional).
Packing way	Equipped with the stacker at the request of client.
